

Russian Government Supports for Industrial investment projects and its Real effects on the Investor's Financial Model

Four Square

by MonDef

May 2020 / Moscow

Preface

Ladies and Gentlemen,

We hereby present our report concerning Russian Government Supports for Industrial Projects and its real effects on Financial Model. It is obvious that the subject is wide and it took a lot of effort to simplify it. We therefore called the report a simple “**Four Square**”, as we believe that the most appropriate way to explain the content is to divide into parts so that will be visually and analytically comprehensible.

In the first section of this report, we mainly focused on practical issues that investors for industrial projects often face, such as:

- Why Invest in Russia?
- Where are the most popular locations in Russia to invest for Industrial Projects?
- Which kind of technical risks may occur during the investment?
- What key factors for the banks and the investors the most important to evaluate the investment project?

The 2nd section explains the main definitions of the most popular territories in Russia, the status of investors and regulations in general.

In the 3rd, we show what kind of tax and infrastructure preferences are provided by the territory in numbers and compare them in simple tables.

In the last section, we analyzed a typical project with an investment budget of 10 mil EUROS (RUB 750 mil) and calculated how tax preferences and state fund's loans with a lower interest rates really affect the financial model in terms of NPV, IRR and payback period.

We hope that this exclusive ‘Tailor-Made’ report will provide you with a step-by-step road map for transparent and reliable investment analysis.

Thank you for your business, your trust and your confidence.

MonDef Team_

Who we are_

- We are an international company with a team of engineers and economists.
- We are an independent company. This is the greatest value of our intellectual business.
- Therefore, we may not have any conflict of interests with anybody, any parties, any establishments.

A. Introduction

- I. Why To Invest in Russia?
- II. Where To Invest in Russia?
- III. Technical risks during the investment
- IV. Where are banks and investors looking?

B. The most popular investment locations in Russia

- I. Special Economic Zone
- II. Industrial Parks
- III. TOSER
- IV. A Neutre land plot

C. Government supports

- I. In General
- II. Who Regulates?
- III. Taxes
- IV. Social Funds
- V. Customs
- VI. Support Programs
- VII. Main Definitions

D. Real effects on the Financial Model

- I. Project Input Data (Technical, Budget and loan conditions)
- II. Scenario I – Results
- III. Scenario II - Results

Why To Invest in Russia?

- Dynamic Economic Growth
- Successful track record of Inflation and Key rate under crisis conditions
- Hard currency reserves
- One of the Largest Consumer Markets
- Russia ranks among the top three profit markets in the world.
- Plenty of vacant market niches and investment opportunities
- Vast Natural Resources
- Unique Geographic Position

Where to Invest in Russia?

- Land Plot with the best technical and infrastructure conditions
- Status must be secured by Laws
- Supplier/Buyer and raw material conditions
- Access to main roads
- Available qualified personnel

Technical risks during the investment

- Uncompleted permission.
- Reliable general contractor / team
- Increasing prices of construction or raw materials.
- Supply chain is broken.
- Building completed but no power.
- Incorrect calculation of gas, electricity and water
- Wrong equipment
- Efficiency

Where are banks and investors looking?

- PB - Payback Period
- NPV - Net Present Value
- IRR - Internal Rate of Return
- Break Even Point

Special Economic Zone

- A territory created to attract foreign investors to Russia.
- Preferential rates are regulated primarily by Federal legislation
- Free custom zone condition for residents is provided
- All necessary engineering and transport infrastructure are provided (the lowest for state SEZ's)
- Very low cost of land plot (excl. private SEZ's)
- Scheduled inspections and penalties are possible to check for non-compliance with the initial investment plan
- Inability for residents to enter into the type of SPIC contract (please see section III - [Main Definitions](#))

Industrial Park

- Specially organized territory for new production facilities
- Provided with infrastructure as well as necessary administrative and legal conditions
- Managed by a specialized company
- Created for the development of industry throughout the Russian Federation
- Possibility to use benefits under state support programs
- Preferential taxation applies only at the regional level
- Possible benefits for foreign equipment without VAT regardless of the FREE CUSTOMS ZONE.
- SPIC contract is available (see section III - [Main Definitions](#))

TASED

- A special legal regime has been established in the territory to ensure accelerated socio-economic development.
- Created to support underdeveloped and economically backward regions of Russia
- More suitable for local manufacturers
- Restrictions for foreign specialists (<20%)
- Shortage of highly qualified specialists due to their outflow from such regions
- Possible lack of infrastructure created for the industry in the desired area
- To use the free customs zone regime the resident applies itself and fulfills all conditions
- Impossible to enter the SPIC

Neutre Land Plot

- Land plot on the territory without specific conditions to the above-mentioned zones,
- Lack of supply of necessary infrastructure
- Risky for new visitors
- Technical and juridical due diligence difficulties
- Unpredictable frequency of inspections
- Higher rates of energy tariffs

C. Government supports – In General_

✓ - provided

- **SPIC 2.0 (СПИК 2.0)** – is the second revised version of the well-known “Special investment contract”. This type of contract is aimed at investors to introduce modern technologies (specified in the list approved by the Government of the Russian Federation) in order to produce in Russia those products that are competitive on the world market.
- **Regional Investment Project (РИП)** – is a project that differs both in Federal and regional purposes.
- **Industry Development Fund (ФРП)** – provides financial support for industrial production with the loans with low rates, lower than commercial bank loans, leasing programs etc. For foreign investors IDF created “Foreign investor's navigator” where the main information about Doing business in Russia can be found (<https://gisp.gov.ru/invest/de/ru-RU>)
 - Federal type of supports provide loans between RUB 50-500 mil. with a interest rate of 1-5%,
 - Regional support of loans are between RUB 5-100 mil. with a rate of 1-5%.
- **«Made in Russia» Status** - the localization that gives an opportunity to participate in state procurement programs. The acquisition of this status takes place in three schemes:
 - The product has to be indexed in Annex to the RF PP No. 719,
 - SPIC 2.0 is signed,
 - Country of origin of the product (Commonwealth of Independent States).
- **Investment Protection and Promotion Agreement (СЗПК)** – Federal Law "Protection of Investment Activities" signed by the President of the Russian Federation on April 1, 2020
- **MSP Corporation (МСП)** – a Corporation that provides guarantees to investors for the payment of loans
- **Regional guarantee organizations** – Provides additional guarantees for MSP projects

Technical Information

	Unit	Amount
Area Information		
Land plot	Ha	2,0
Building Area	m2	10 000
Infrastructure		
Electricity	MW	1,5
Gas	m3/h	400
Water supply	m3/d	5
Duration	months	15
Labor	per	15
Shift	unit	1
Average salary	Rub/m	40 000

Closed area:
10,000 m² on a
2 Ha land plot

Investment Costs

Scenario I

Item	Rub (mil)		Euro (mil)
Land Plot	40	5%	0,50
Construction	250	33%	3,13
Equipment (all imported)	400	53%	5,00
Infrastructure	60	8%	0,75
Total	750	100%	9,38

Scenario II (TOSER and SEZ)

Item	Rub (mil)		Euro (mil)
Land Plot	-	0%	0,00
Construction	250	38%	3,13
Equipment (all imported)	400	62%	5,00
Infrastructure	-	0%	0,00
Total	650	100%	8,13

Euro/Rub	80,00
USD/Rub	74,00

2 scenarios:
I: RUB 750 mil
and
II: RUB 650 mil

Taxes and Profit Margins

Taxes

VAT	20,0%
Profit Tax	20,0%
Property Tax	2,2%
Personal Tax	13,0%
Social Funds	30,0%

Margins

Operational Expenses	65,0%
Administrative Expenses	22,0%
EBIDTA/Income	13,0%
Net profit/Income	5,0%

Interest Rate	12%
----------------------	-----

Cost/Income
87%,

EBIDTA margin
13%

Investor's Questions

- When will the project pay back ? (PB)
- How much interest does an investment bring me? (IRR)
- What if, I use loan instead of equity?
- What is the interest rate and what for?
- How much tax preferences effect the Fin. Model?
- How the Infrastructure and Land cost effect results?

Lets
analyze
them on
the next
page!

IV- Financial Model - Scenario I: If we assume, total cost is RUB 750 mil for all

Profit Tax

Location	%	NPV	IRR	PBP
ТОСЭП	0%	333 151	28,6%	4,5
ОЭЗ	2%	323 652	27,9%	4,6
ИП, СУ	20%	231 717	21,7%	4,9
Δ (max-min)	20%	101 434	6,9%	0,4

Total cost : RUB 750 mil.
Profit tax changes from 0% to 20%
 While **other rates** stay **maximum** (Social funds 30%, Property Tax 2,2%, and interest rate 12%)

Social Tax

Location	%	NPV	IRR	PBP
ТОСЭП	7,6%	235 323	21,9%	4,9
ОЭЗ	30,0%	231 717	21,7%	4,9
ИП, СУ	30,0%	231 717	21,7%	4,9
Δ (max-min)	22%	3 606	0,2%	0,0

Total cost : RUB 750 mil.
Social fund changes from 7,6% to 30%
 While **other rates** stay **maximum** (Profit tax 20%, Property Tax 2,2%, and interest rate 12%)

Property Tax

Location	%	NPV	IRR	PBP
ТОСЭП	0,0%	244 492	22,3%	4,8
ОЭЗ	0,0%	244 492	22,3%	4,8
ИП, СУ	2,2%	231 717	21,7%	4,9
Δ (max-min)	2,2%	12 775	0,6%	0,1

Total cost : RUB 750 mil.
Property tax changes from 0% to 2,2%
 While **other rates** stay **maximum** (Social funds 30%, Profit Tax 20%, and interest rate 12%)

Interest Rate

Location	%	NPV	IRR	PBP
I	7,0%	313 180	21,60%	4,69
II	9,0%	279 065	21,65%	4,77
III	12,0%	231 717	21,74%	4,90
Δ (max-min)	5%	81 463	0,1%	0,2

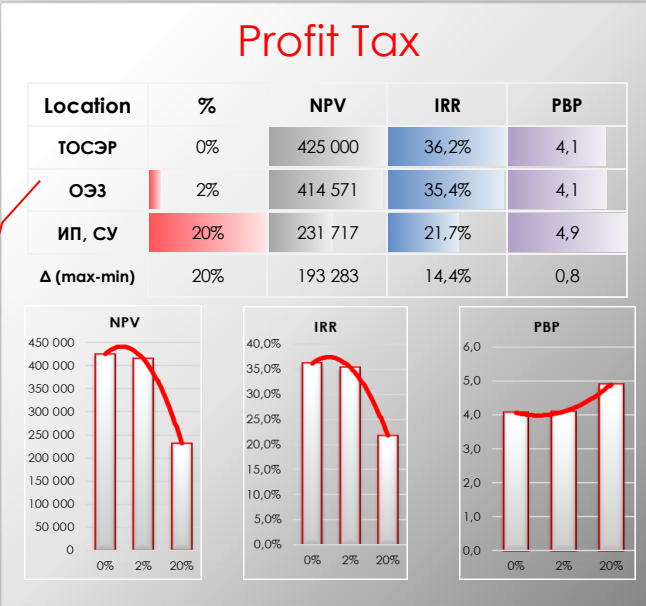

Total cost : RUB 750 mil.
Interest rate changes from 0% to 12%
 While **other rates** stay **maximum** (Social funds 30%, Profit Tax 20%, and property tax 2,2%)

* All in mil Rub, PB in years

IV- Financial Model - Scenario II: Cost changes due to Land Plot and Infrastructure

Total cost : RUB 650 mil. for TASED and SEZ where RUB 750 mil. in Neutre land plot

Profit tax changes from 0% to 20%

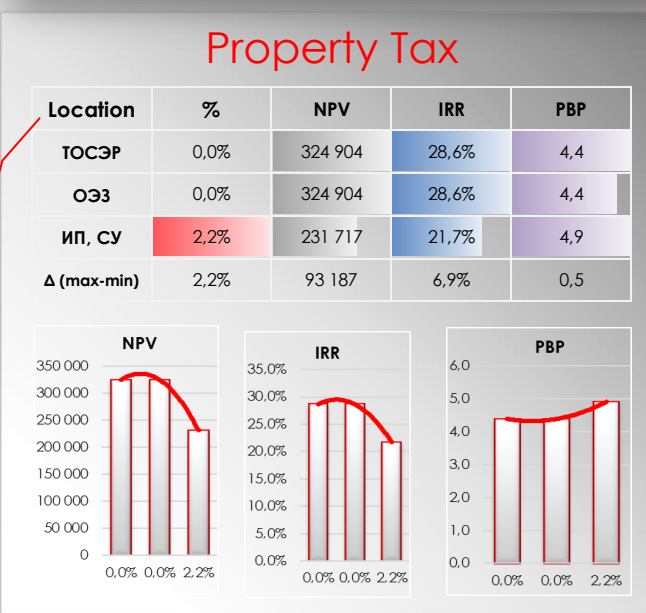

While other rates stay maximum (Social funds 30%, Property Tax 2,2%, and interest rate 12%)

Total cost : RUB 650 mil. for TASED and SEZ where RUB 750 mil. in Neutre land plot

Social fund changes from 7,6% to 30%

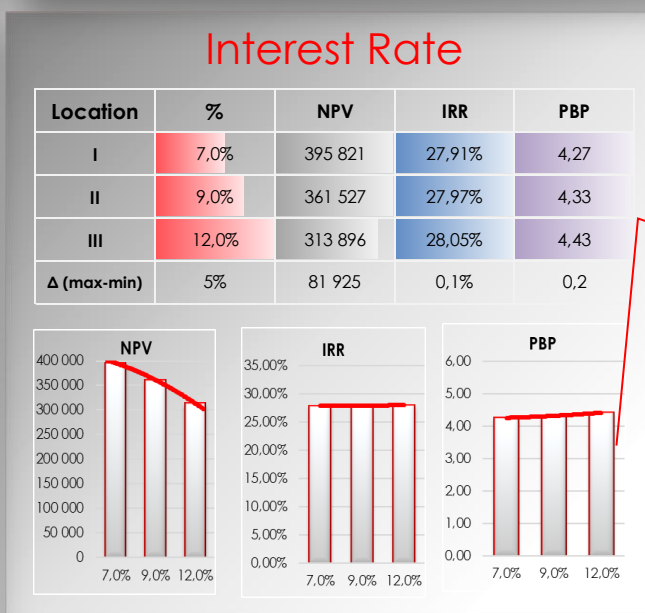

While other rates stay maximum (Profit tax 20%, Property Tax 2,2%, and interest rate 12%)

Total cost : RUB 650 mil. for TASED and SEZ where RUB 750 mil. in Neutre land plot

Property tax changes from 0% to 2,2%

While other rates stay maximum (Social funds 30%, Profit Tax 20%, and interest rate 12%)

Total cost : RUB 650 mil. for TASED and SEZ where RUB 750 mil. in Neutre land plot

Interest rate changes from 0% to 12%

While other rates stay maximum (Social funds 30%, Profit Tax 20%, and property tax 2,2%)

* All in mil Rub, PB in years
